SCREENWORKS

6" TRUSS PROJECTION SCREEN 396*678/ 366*648 cm 16:9.

Technical information

Front projection

Matte Brite+™

Gain : 1.4

Viewing Angle : 45 degrees off center axis

Recommended for use when ambient light is a concern.

No blackout surface required in high ambient light applications.

This surface is designed to offer the best combination of gain & viewing angle for optimal image quality.

Screen material is foldable, washable and available with snaps or grommets

Rear projection

RP

Gain : 2

Viewing Angle : 45 degrees off center axis

Provides excellent color rendition, image contrast, registration, and a wide viewing angle.

RP is a translucent, neutral gray vinyl rear projection surface material offering high transmission and low reflectance values.

Screen material is foldable, washable and available with snaps or grommets.
